## New Features of Live 1:1

### Google Calendar Link

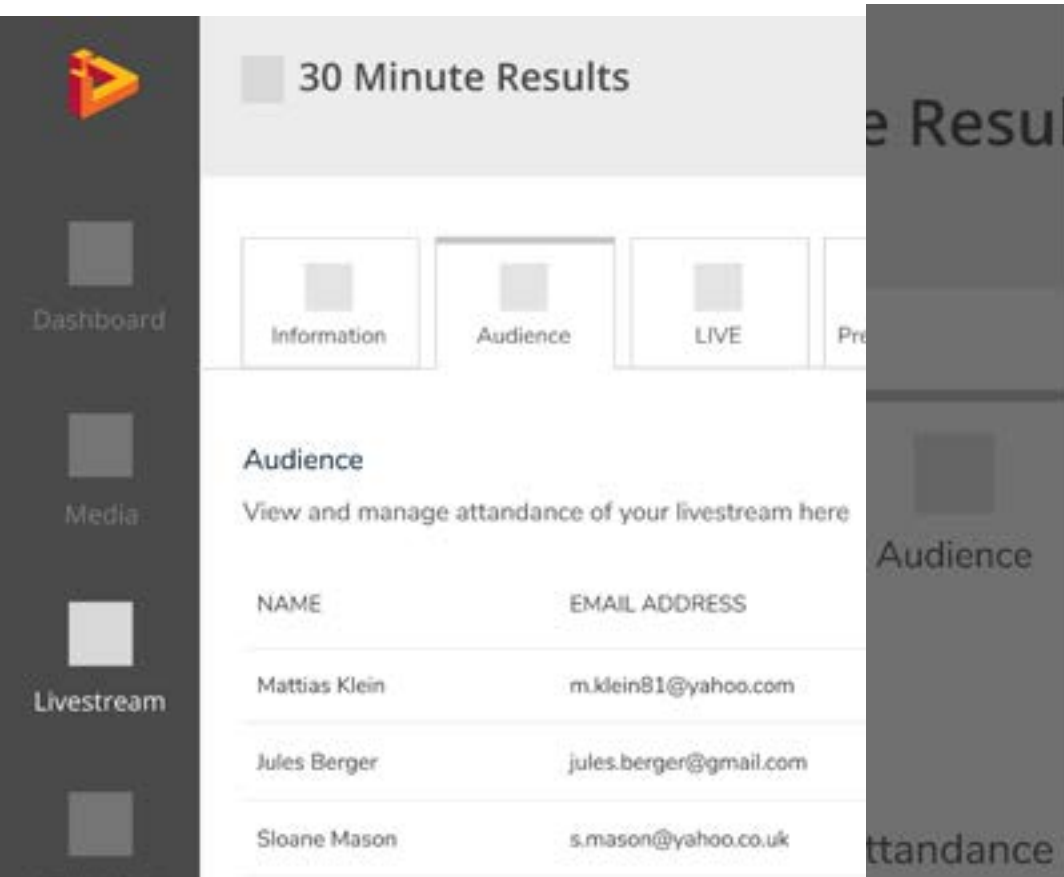

The new Google Calendar Link allows you to schedule your livestreams throughout the month and allows your users to see what livestreams are available for each day during the week and the Google Calendar Link makes it easy to sign up for a livestream class with just the click of a button.

### Audience Tab & Export

In the new audience tab feature you will be able to see which members have signed up, their email, whether they have actually joined the session and time watched. Live 1:1 also allows you to export this information so you can improve your workouts and get real time analytics.

### Opt In & Class Count

From the customer side Live 1:1 gives easy access to opt into classes and in turn allows owners to see their class count from the main livestream page or the audience tab. This allows owners to see how much engagement their live classes are getting and for your users to access all the great content you have.

## Live 1:1 Bug Fixes

---

- Subscribers can now join a class even it is already in progress.
- Clients are now able to add a livestream to the client portal without adding a subscription or price.
- Calendar fix to display the week correctly and future weeks correctly.
- Livestreams are listed from most recent
- Expired livestreams are no longer listed under search results
- Upcoming livestreams now have the correct templates
- Timezone is customized to whatever timezone you are in and uses that as default timezone
